

**NEW FOR
2010**

T66 Camera Tractor

The new T66 Steerable Camera Tractor is the latest in the long line of innovative sewer camera transporters from IBAK. The T66 is the natural evolution of the incredibly popular KRA65 model that has been sold throughout the world. The T66 boasts a heavier chassis for added traction, smaller external dimensions for ease of use and greater pulling strength than its predecessor.

Small and agile, yet more powerful than some tractors twice its size - the T66 is an integral part of an economic and ergonomic pipeline inspection system for pipelines ranging from 4" to 24" in diameter.

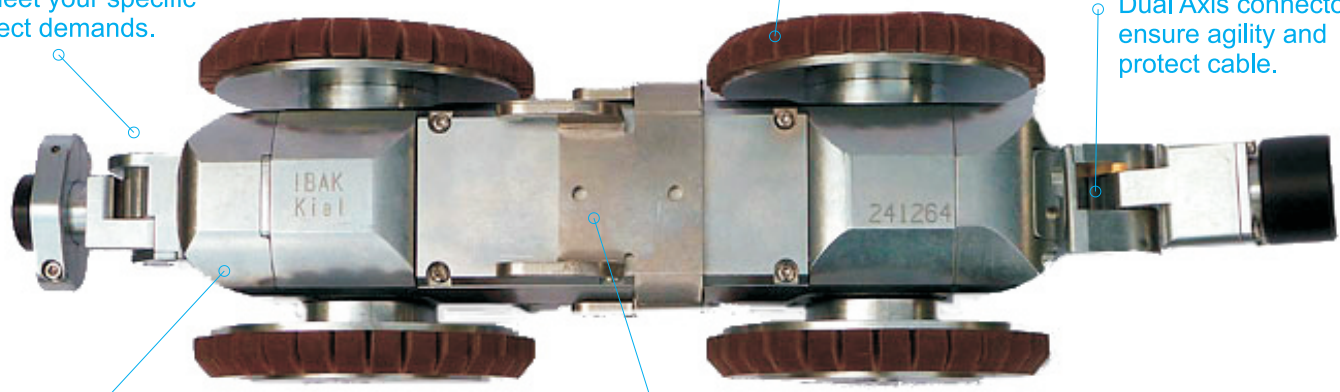

New T-Gear Drive System increases torque and provides worry-free performance!

New front connections are easily field-swappable to meet your specific project demands.

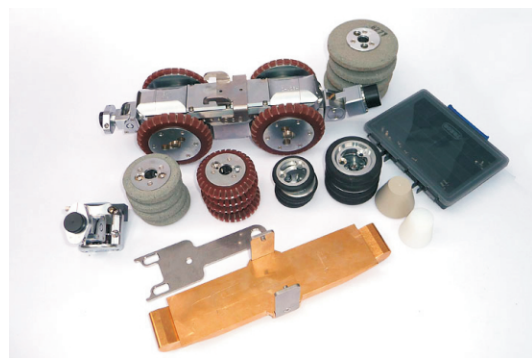

Variety of new wheel options allows the ultimate flexibility and performance!

Dual Axis connectors ensure agility and protect cable.

Zero radius steering and Automatic Tilt Compensation (ATC) Standard!

The new chassis is heavier for better traction and smaller to allow easier handling and operation in smaller pipelines.

The T66 has many new optional accessories to increase your productivity and performance!
